

# Transport Addendum

## Eden-Agro-Ventures Farm

**Purpose:** Immediate funding request for a dedicated off-road motorbike to end recurring hire costs and secure daily milk collection.

### The Ask

Motorbike (Honda/Kibo 250cc)	KES 245,000
Annual comprehensive insurance (theft, fire, accident)	KES 12,150
<b>Subtotal</b>	<b>KES 257,150</b>

### Rationale & Financial Logic

Wasonga currently spends approximately **KES 39,000 per month** on hired transport for milk collection. A dedicated motorbike removes this recurring cost, secures morning pickups, and improves reliability to buyers.

**Estimated payback:** Saved hire costs cover the motorbike in approximately **6.3 months**.

### Impact Metrics

- Weekly milk collected: **1,300 L**
- Daily loss from tsetse pressure: **30–40 L**
- Households served: **3,000**
- Estimated monthly savings from stopping hire: **KES 39,000**

### Implementation Plan (30 days)

1. Day 0–7: Procure motorbike, confirm vendor, obtain purchase receipt.
2. Day 8–14: Register the vehicle, fit basic carrier, lock, and safety kit.
3. Day 15–30: Train rider, integrate route logs into WhatsApp ledger, begin weekly reporting.

### How to Fund
